

# Counting Challenge

## Directions

1. Arrange students into a circle where they can all see each other (seated or standing is fine).
2. Tell students that they will have to work together to see how high they can count as a team.
3. Starting at 1, students will randomly count up by saying the number aloud.
4. If more than one student says a number at the same time or speaks over someone else, the group has to start over and go back to one.
5. Allow students to play several rounds and see how high they can count working together as a team.
