

Mingle Mingle Activity

Directions

1. Have all students stand.
2. Tell students they are to begin walking around the room saying hello and greeting each other.
3. After a few moments, the teacher will call out a random number between 2-5.
4. Once a number is called, students must assemble groups of that number. If a student cannot find a group, they're eliminated for that round of the game.
5. Repeat steps 2-4 until only 2 students remain.

This is a quick and simple activity that can be repeated for several rounds with a variety of different age groups and group sizes.
